

Thank you for renting your International Wireless Hotspot from Cellular Abroad!

To begin using your device, hold down the power on/off key for roughly 3 seconds until the indicator lights flash on the hotspot screen.

To enable the internet connection, you must press and hold the “Connect to internet” button for roughly 3 seconds, or until the “M” symbol at the bottom right flashes rapidly.

Find the Mifi hotspot option on your Wi-Fi list and login with the password sticker labeled on the device. You are all set!

Troubleshooting:

If you are unable to connect while overseas:

Make sure the “**R**” symbol has appeared before you use the “**Connect to Internet**” button .

Still not connecting? – take the back off, take out the battery, slide out the SIM card and reassemble

Still can’t connect – Link to the device, bring up a web page, type **192.168.1.1** in the browser bar. This will bring up a landing page. Login with Username: **admin** Password: **admin** Then go to settings>dialup>profile management and check that the **APN is set to mobile.vodafone.it (this is case sensitive)**.

Coverage:

Please note Monaco does not have coverage.
