

European MIFI Instructions

Your Mifi hotspot's model number and password are sticker labeled on the back of the device.

- Once overseas power on the device.
- The Mifi's model number will appear as an available WiFi option. Login with the password. (case sensitive))

You can now access the internet.

Your service allows 9GB of data in any given 30 day period.

Having connection issues? Press the "WPS" (connection) button on the edge of the device.

1. **If you are still having connections issues confirm that your APN is set to: 3internet**
2. Once paired to the MIFI type **192.168.1.1** into your internet browser
3. Next click the **Settings** tab
4. The login is: **admin**
5. The password is: **admin**
6. Click **Dial up** and then **Profile Management**
7. Confirm the profile **APN** is **3internet**
8. If it is not set to **3internet** edit the profile to make the corrections
