

Satellite Phones

People who live, work, and vacation in areas outside cellular coverage or in places with poor landline service will benefit from the direct link provided by Cellular Abroad's Iridium World Satellite Service. The SIM cards contain all customer identification and account information allowing shared use of phones with individual billing. Iridium also offers data up to 10.0 kbps. You will never miss a call again with Call Forwarding and optional Voice Mail features. You have the option to have Iridium calls forwarded unconditionally or only when you are unavailable (i.e. when your phone is turned off). You are notified on your phone and/or Iridium pager when messages are deposited in your personal mailbox, which you may access via satellite or terrestrial communications.

Iridium Satellite Series™ 9505A

\$1495.00 - Complete Kit - with a SIM Card, High Capacity Lithium Ion Battery, AC Adaptor, International Plug Set, Cigarette Lighter Adaptor, Leather Holster, Antenna Adaptor, Portable Auxiliary Antenna, Headset, and User Manual

Overview

Cellular Abroad is pleased to introduce Iridium's latest satellite phone, the Satellite Series™ 9505A Portable Phone. Physically and functionally similar to its predecessor - the [Iridium 9505](#), this latest offering introduces some minor product changes.

The phone is significantly smaller, lighter and more resistant to water, dust and shock than Iridium's original [Iridium 9500](#) and is ideal for industrial or rugged conditions, yet appealing to the traveling professional. Business, adventure, or pleasure, you can stay in touch across seas and time zones, in remote locations and on the go. In conjunction with 24x7 live technical care and competitive pricing plans, you are ensured that you are connected anytime, anywhere.
