

## China Unicom MIFI Instructions

**Please note that you MUST ACTIVATE your new China Unicom SIM Card first! Otherwise, it won't work**

For activating your SIM, please:

Email a picture of your passport ID page and Chinese visa page (if available) to [support@cellularabroad.com](mailto:support@cellularabroad.com)

**Your Mifi hotspot's model number and Wifikey (password) are sticker labeled on the back of the device.**

- Once overseas power on the device.
- The Mifi's model number will appear as an available WiFi option. Login with the Wifikey. (case sensitive)

**You can now access the internet. Your service allows up to 6GB of data.**

**Having connection issues? Press the "WPS" (connection) button on the edge of the device.**

1. If you are still having connections issues confirm that your APN is set to: 3gnet
2. Once paired to the MIFI type **192.168.1.1** into your internet browser
3. Next click the **Settings** tab
4. The login is: **admin**
5. The password is: **admin**
6. Click **Dial up** and then **Profile Management**
7. Confirm the profile **APN** is **3gnet**
8. If it is not set to **3gnet** edit the profile to make the corrections
