

# Talk Abroad® Quick Reference Guide

**SERVICES ARE ACTIVATED ONCE THEY REGISTER ON A WIRELESS NETWORK! Service and Credit balance are extended plus 12 months from last usage. Simply power on and check your balance or make/receive a call or text to extend your service life!**

## How to place a call:

1. Dial 00
2. Country Code (For example, the United States country code is 1)
3. Area Code, Phone Number
4. Next, press the SEND/CALL button to initiate the call

- To reach Cellular Abroad dial: **00 1 310 862 7100 send**
- To reach another Talk Abroad customer dial: **00 44 7XX XXX XXXX send**

<b>Popular Destinations</b>	<b>Country Specific Dialing</b>
<b>United Kingdom</b>	<b>00 44 ..... SEND</b>
<b>Italy</b>	<b>00 39 ..... SEND</b>
<b>Germany</b>	<b>00 49 ..... SEND</b>

**Toll Free Customer Support within North America (8am-4pm PST Mon-Fri)  
800.287.5072**

# Talk Abroad Data Setup

## For data capable phones only

If you want to use 3G data off of Wi-Fi you must set your phones APN to:

**globaldata**

(no username or password required)

### How to set an APN:

(iPhone users: You cannot see the APN option until the foreign SIM card is inside. The settings will automatically revert to your current APN when you replace your US SIM Card)

**iPhone 7** - Settings>Mobile Data>Set Data Roaming to on>Mobile Data Options>Mobile Data Network>set APN

**iPhone 5, 6** - Settings>Cellular>set Cellular Data to on>go into Cellular Data Options> set Data Roaming to on> go into Cellular Data Network> set APN

**iPhone 4** - Settings>Cellular>set Cellular Data to on>set enable 3G to on>set Data Roaming to on> go into Cellular Data Network> set APN

### Android 1.6 / 2.1 / 2.2 / 2.3

From the Home screen **Menu** > **Settings** > **Wireless & networks** > **Mobile Networks** > **Access Point Names (APNs)** > **Menu** key (or three-vertical- dot icon) > **Create new APN** use **Menu** key again to **Save**.

### Android 4.0 / 4.1 / 4.2/4.4 / 5

**Settings** menu > **Wireless & Networks** or **Network Connections** or **Connections** tab > **More settings, More...**, or **More networks** > **Mobile networks/Cellular Networks** > **Access Point Names** > **Menu** key or (three-vertical-dot icon) > **Create new APN** use **Menu** key again to **Save**.

### Android 6.0

From the **Settings** menu, look under **Backup and reset**, under **Reset** > **Reset network settings** > **RESET SETTINGS** > If a PIN, Password, or Fingerprint has been enabled, enter it > Tap **RESET SETTINGS** again > A confirmation message will display when complete > **Menu** key or (three- vertical-dot icon) > **Create new APN** use **Menu** key again to **Save**.
